

Stainless Steel Plug for Power Transmission & Hydraulic Industry Gearbox, Reducer, Compressor, Pump, Motor, Valve, Hydraulic station, etc.

- Strict Quality Control
Reliable Quality
- Massive Inventory Quick
Delivery Optimized
- Production Competitive
Price

- Various Standard & Full
Range One Stop Purchase

ACEI takes firm and remarkable action for meeting the high-end market demands of corrosion-proof screw plug application. We have invested in a series of molds for stainless steel screw plugs and other related inventory of rough castings. These stainless steel materials include: AIS1304, 304L, 316, 316L, 316Ti, 430 (1.4301, 1.4306, 1.4401, 1.4435, 1.4571, 1.4105), etc. This covers most of the world's national standards. With our continuing development and investments, we work together with our customers to re-shape the market of stainless steel screw plugs for better quality, reduced cost, and faster delivery.
